

CONVERSION OF HIGHER EDUCATION BOOKS TO EBOOKS IN RECORD TIME

Apple

Amnet is one of the few global iBooks conversion and delivery houses approved by Apple

Amazon

Amnet is an Amazon-recognized EPUB conversion and delivery house

Amnet—A Snapshot

Delivering Certainty

Our relationship-centered, customer obsessed approach provides the client with the certainty that their expectations are met every time.

Smartshoring®

Our unique delivery model makes effective use of the best talent wherever it may be which helps you stay competitive, increase profits, and accelerate growth.

Robust BCP

We retain multiple locations across the globe which mitigates the effects of business disruption. BCP is also activated through Work From Home alternatives.

Scope of the Project

The client is one of the largest and oldest publishers of trade, college, and professional titles.

The client approached Amnet for conversion of their higher education books to eBook format using their workflow with a TAT of 7 business days for each issue. Amnet took up the challenge and confirmed that we could meet the quick turnaround time after completion of a pilot project.

FLEXIBLE RESOURCES

SOLUTIONS

01

We completed training on the Gitlab NPM portal in 3 months and successfully completed the pilot evaluation. This process helped us to gain customer confidence. They soon started assigning live projects.

02

We documented bugs and the customer's guidance, creating a centralized repository where the team could access instructions and technical solutions to minimize the clarification queue and dependence on our client contacts. This helped us to improve the quality and meet the delivery timelines, and we were able to deliver around 1,000 – 1,500 pages in a month.

CHALLENGES

01

According to the agreed process, the customer would upload the PUG input files in the cloud-based GitLab portal. This NPM environment was new to our team and required training.

02

To create the PUG output, we needed to design complex layouts using Bootstrap SASS technology, which involves a complex coding process.

Benefit

Amnet helped the client to deliver high-quality ePub files to their distributor in a timely manner. The customer assigned 7,000 pages with a 6-month turnaround time. Amnet is the client's preferred vendor now.
